## Offshore Marine Technology – PRESS RELEASE for Immediate Use

25<sup>th</sup> August 2005

### WHITE CAP MARINE LAUNCHES NEW 40' WITH NAVIGATOR HELM SEATS AND UNDERWATER LIGHTS

Offshore Marine Technology has provided the Helm Seats and Underwater Lights for the latest Whitecap Marine boat to be launched in Australia. The owners from Papua New Guinea purchased our Helm Seats and Underwater Lights in April 2005. They have chosen to have one Navigator Helm Seat without headrest on a pneumatic pedestal and one Navigator Compact Seat on a pneumatic pedestal in their Flybridge. Across the transom will be 2 x 2" Xenon underwater lights.

The boat was launched and on display at the Sydney Boat show. The owners were very happy with their investment in the Navigator Seats and the builder, David Heszberger commented on how comfortable they are when you are either out to sea or within the Harbour. David brought the boat to Sydney from Botany Bay just prior to the Sydney Boat Show through rather large seas and he felt that both the boat and seats handled the rough weather extremely well.

White Cap Marine has agreed with Offshore Marine Technology to provide our Navigator range as options for all forth coming builds.

#### **About Offshore Marine Technology**

Offshore Marine Technology was established in 2000 to provide the Australian and South Pacific market with high quality seats and cranes. "Every Navigator chair is Australian designed and built from stainless steel. They are upholstered in quality leathers or vinyl and comply with international high speed craft (HSC) regulations." As needs arose additional products have been designed under the well known brand of Navigator. Including pedestals, Navigator Compact Cranes and QuickLift.

Additionally OMT are providers of Opacmare products, OML reverse osmosis water purification systems, Ultraleather and Underwater Lights for the South Pacific. For further information, go to [www.boatparts.com.au](http://www.boatparts.com.au)

#### **About White Cap Marine**

White Cap Marine's factory is located in South Australia. Director and avid fisherman, David Heszberger is located in Sydney and was the first person to catch a Marlin for the Botany Bay Game Fishing Club. With this in mind, he has spent many a day designing and improving on his truly magnificent Australian Blue Water fishing boats. The most recent White Cap 40' has been sold to a couple located in Papua New Guinea who are also big fishermen! For further information on White Cap Marine, contact David on 02-9567 9065 or [whitecapmarine@bigpond.com.au](mailto:whitecapmarine@bigpond.com.au). Their website is [www.whitecapboats.com](http://www.whitecapboats.com)
